## Overview

This heavy-duty LED light bar is great for off-road driving lights, daytime running lights, or fog lights on your truck, ATV, or UTV and can also be used for industrial lighting, marine lighting, and tractor lighting. The 30" work light bar features 2 rows of powerful LEDs that emit 11,000 raw lumens of cool white illumination. This LED light bar is available with a wide 90° flood beam or a combo 30° spot/90° flood beam pattern for focusing on long- and short-range distances simultaneously. The durable LED work light is waterproof and shock resistant. A polycarbonate lens and powder coated black aluminum housing protect internal components, and an integral heat sink allows LEDs to run cool, which leads to an incredibly long life span. Mounting feet and installation hardware are included along with a 40" wire lead with an ATP connector and a mating 13" ATP pigtail adapter. The 180-watt

light bar operates within a wide 10-30 V DC range.
